ABOUT

My career path is to become an excellent Fullstack Developer, who can create high quality, secure and friendly products which can satisfy the expectation of customers.

I look forward to working with a professional team, where I can enjoy learning and sharing to help each other grow, practicing my skills so I can adapt well to the needs and flexible changes of the market.

It would be great if I had the opportunity to work in an environment where English is the key point because I want to focus training my ability to communicate and work in English.
